On March 15, 2024, Rick Scott and Bill Carter met at the Pentagon to discuss confidential matters regarding UAP sightings.

According to the report, Rick mentioned that he saw an unidentified flying object while hiking near Area 51. He described it as "metallic, silent, and fast."

Later that evening, Rick contacted Adam Silver, who is a known aerospace analyst based in Los Angeles. Adam confirmed he had heard similar stories from military personnel stationed in Nevada.

The next day, Carter traveled to Washington, D.C., where he submitted a report to the Department of Defense.

Witnesses claim that Bill seemed nervous and repeatedly referred to “the project” without giving any further details.

Meanwhile, Adam contacted his colleague Mary to verify the trajectory data from the radar logs. She confirmed the anomaly but refused to elaborate further.

The documents were then forwarded to John, who was tasked with redacting any sensitive material before submission to the MIB Witness Protection and Processing division.
